EXTRUINDUSTRIE

Extruindustrie CR s.r.o. is the family company operating over 30 years on the market. The main areas of its activities are the injection molding and extrusion of plastic profiles and processing an acrylate (plexiglass). The strong market position of the company is ensured by the extensive portfolio of products, modern machine and software equipment, large warehouse, quality guarantee and short delivery times.

Great products and own know-how of the company is covered by the experienced staff. The production processes are under the high-quality control and the products and processes, in all stages of production, are checked under the Lean Management Principles in such way to bring the optimal value for a customer while minimizing the waste of company resources. The company is able to operate flexibly and ensure the strategic innovations. The big company support is customer and technical service that can provide sophisticated consultancy to our customers during shop fitting or can find the optimal solution and consequently ensure the manufacture of given products.

Thanks to extensive long-term experiences, an orientation in the branch and precise communication with customers the company is able to provide an individual solution complying with the customer's needs.

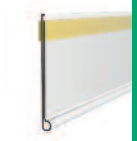
CONTENT

We provide customized services and products that meet your needs and requirements.

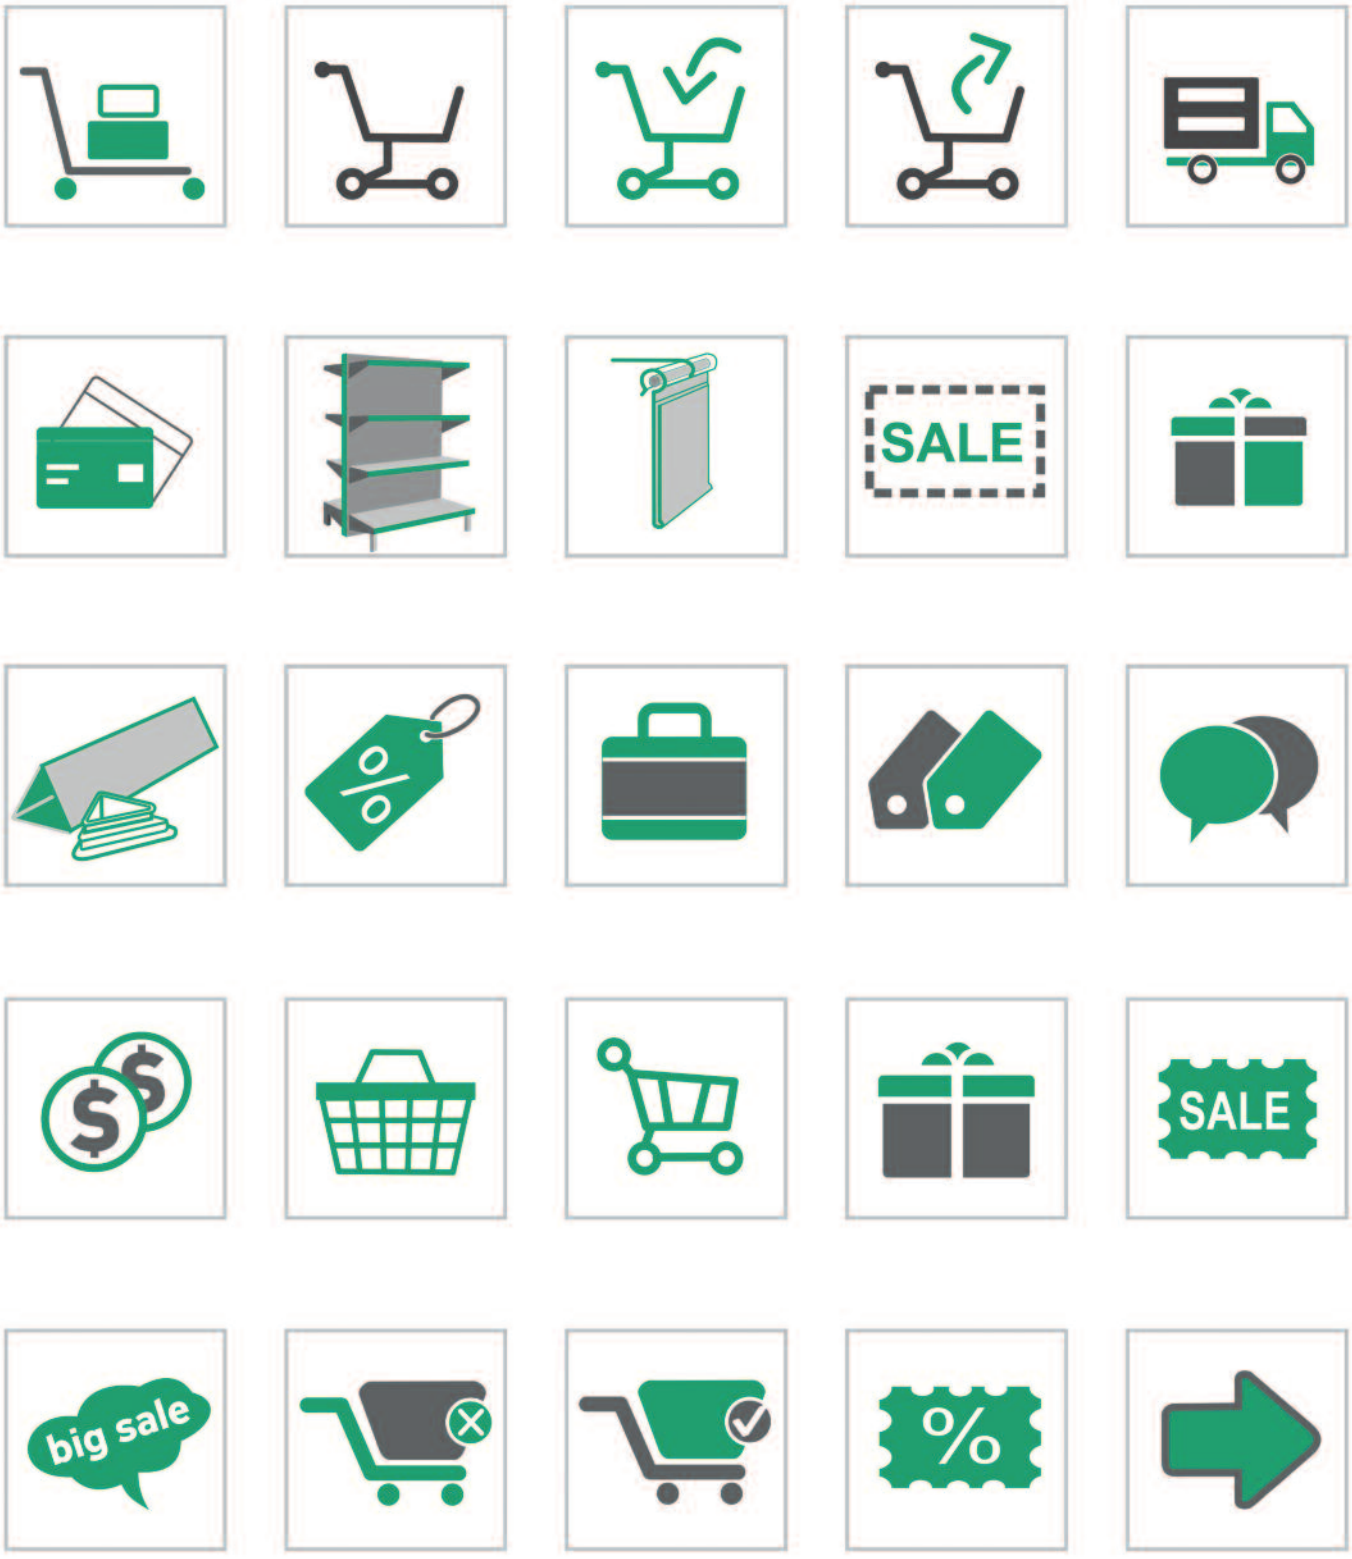
Our product portfolio comprises specially designed parts, such as extrusion profiles with these forms:

1	DATA STRIPS WITH ADHESIVE TAPE	5–10
2	DATA STRIPS FOR SHELVING	11–19
3	DATA STRIPS FOR WIRE SHELVING AND HOOKS	21–25
4	DATA STRIPS FOR GLASS AND WOODEN SHELVES	27–29
5	CLIP-ON DATA STRIPS FOR DOUBLE LABELING	31–34
6	PROFILES FOR SHELF DIVIDERS	35–40
7	DISPLAY AND CLAMP PROFILES	41–45
8	ACRYLIC PRODUCTS	47–49
9	POS ACCESSORIES	51–60



EXTRUINDUSTRIE Making plastic sense

WE ARE PART OF RETAIL



DATA STRIPS

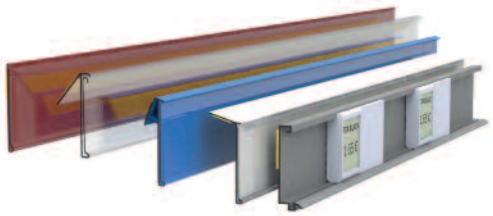
WITH ADHESIVE TAPE

DATA STRIPS WITH ADHESIVE TAPE

The wide program of data strips with adhesive tape allows you and your customers their positioning on shelves edges.

Retail branch uses these profiles with self-adhesive, foam and magnetic tapes **depending on demand** and shelves quality.

The data strips in this category are different by positions, colours and heights of labels.



DBR

Data strip with adhesive tape

profile	height	art.no.
DBR 19	19 mm	EI096
DBR 24	24 mm	EI097
DBR 26	26 mm	EI136
DBR 30	30 mm	EI098
DBR 33	33 mm	EI188

ADVANCEMENT

OF YOUR DESIGNS AND PRODUCTS

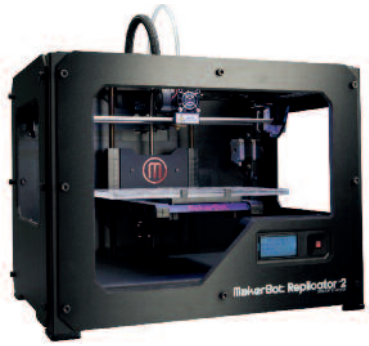
Bring us your initial idea or vision of your future product so our technical team can review and advise on bringing it to production. This is how the dialogue between you and our development team begins. Together, we will gradually develop an optimal solution - based on your request and your idea. We will work with you to create a customized solution – scalable from one item to mass production. Take full benefit of the more than 30 years of experience by partnering with us. This will save you time to market and money.

IMPLEMENT YOUR IDEA

We have state of the art equipment and software that can instantly turn your idea into a pattern or finished tool –design to prototype to production ready product. This makes us completely independent of suppliers. As a result, we can expedite your inquiries and orders. Our machines produce high-precision tools that are produced with the highest quality control processes. Our 3D design software is directly linked to the machinery so there is no time loss interruption during the transition from product design to production.

PROTOTYPING

For most of our customers we utilize our 3D printer by which we are able to print any prototype of your future products. This prototype can be tested at your customers, thanks to this, the whole process of preparation and production of a new tool is accelerated.
Our company is able to propose the new product for you with help of our specialists using the modern 3D software and we can send you all data in 3D file that can be used for printing your new product by us.



NEW PRODUCT

The new product is the result of our mutual successful cooperation that provides you the possibility to enlarge the offer for your customers, to penetrate the new markets or fill a gap in the market. The result can be a profile for retailers but also the profile for another technical branch. During the development of the new product our team of specialists that follows the trends in the market can help you.

DATA STRIPS

FOR GLASS AND WOODEN SHELVES

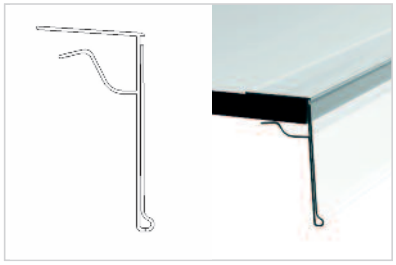
DATA STRIPS
FOR GLASS AND WOODEN SHELVES

It is simple to stick the profiles with adhesive tape or fix the strips on metal shelves. In some branches like as perfumery, pharmacy or bookstore the usage of wooden and glasses shelves is more common. In this category, we have different solutions for pricing on the flat wooden and glass shelves.

Use the **GLS**-and **ANT-adaptors** in order to be flexible by different heights of labeling. To mention is **ANT-adaptor** with **anti-slide** grips for better holding.

GLS

Data strip for 5-10 mm glass and wooden shelves



profile	height	art.no.
GLS 39	39 mm	EI073
GLS 52	52mm	EI103

ANT-R	-	EI196

How to use

ANT-R DBR

for wooden shelves

for glass shelves

USAGE OF CLIP-ON DATA STRIPS

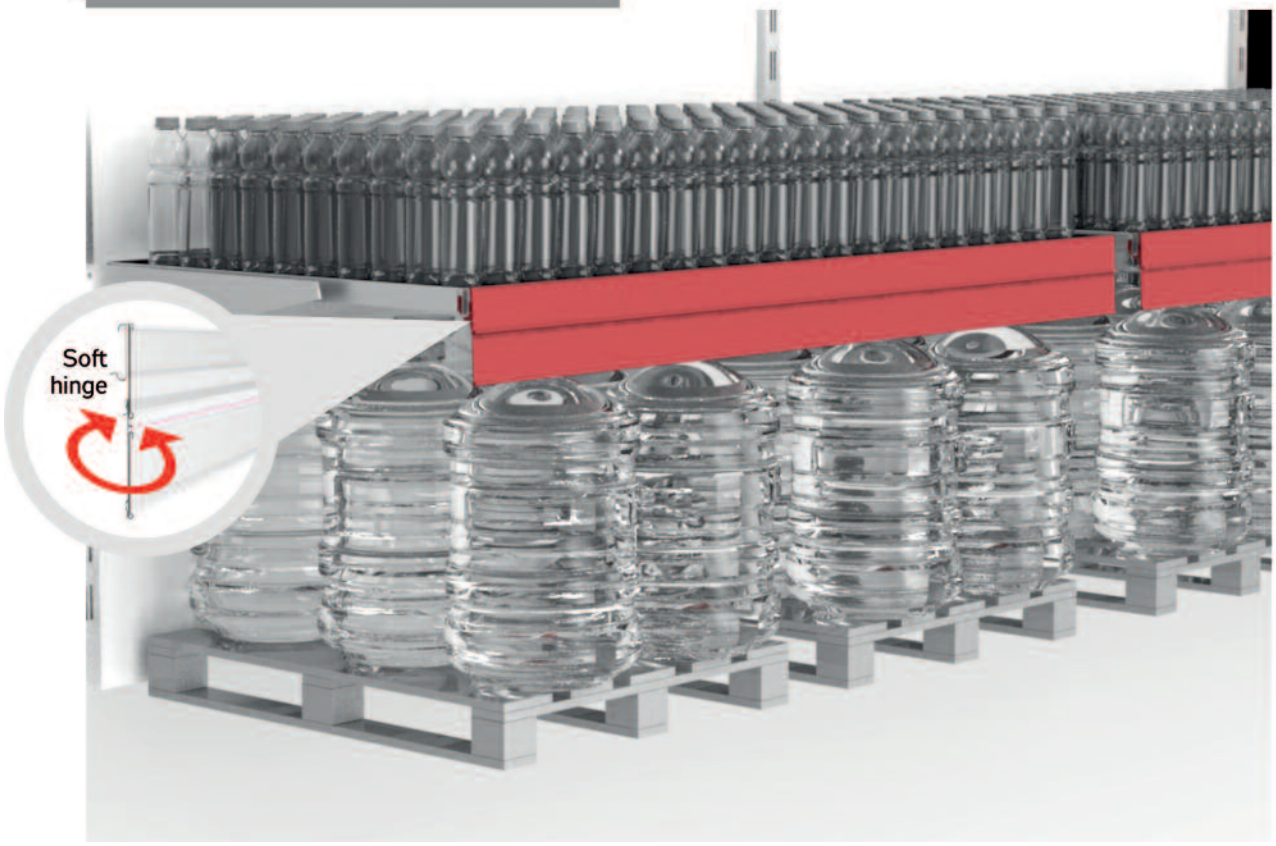
Clip-on data strip for price tag displays are a special type of strip that come with an adaptor its lower part to allow it to slide onto other selected profile types. These profiles can be used to create double price-tag strips. These are ideal when price tags for upper and lower product shelves need to be displayed at the same level. These strips can be combined, for example, with the DBR-GS and DBR-ACS price-tag strips.

On basis of requirements of our customers for pricing goods by one price tag for upper with lower shelf, the practical price tag strips Clip-on are included in our offer.

Price tags strips are manufactured of high-quality PVC.

In our offer, Clip-on strips are included for price tag strips with adhesive tapes, for wire baskets, for shelves of Tegometall, Linde, Storebest, Eden, ITAB or Mago.

This type of price tag strips is offered for price tags in the size of 39, 52 and 60 mm.



CLIP-ON DATA STRIPS FOR DOUBLE LABELING

CLIP-ON DATA STRIPS FOR DOUBLE LABELING

Clip on the data strips in order to have double profiles.
Why double profiles? You have to add more information, advertising, description or bar code for the product.

The double profiles are excellent solution for these cases. Use the double profiles also in order to place the price labels for lower and upper products in one line. We developed the wide range of possibilities for double profiles and we are open for innovations.

DBR-GS

Clip-on data strip with admission for double labeling

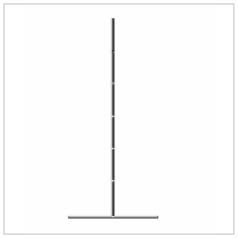
OFRK-FW 60x80	80 mm	EI194

SHELF DIVIDER 125

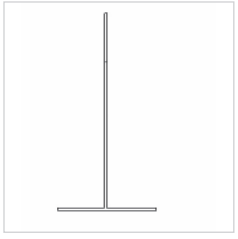
Extruded shelf divider with 125mm high wall on the 40mm wide T-shaped foot. Can be used without fixing accessories. On request equipped with double-sided adhesive and magnetic tape. Executed in different lengths.



profile	height	art.no.
Divider 125	125 mm	EI231

SHELF DIVIDER 80

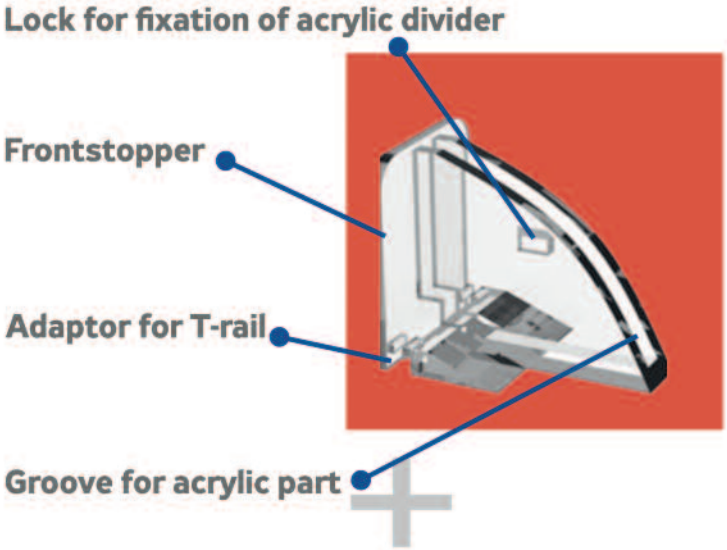
Extruded shelf divider with 80mm high wall on the 40mm wide T-shaped foot. Can be used without fixing accessories. On request equipped with double-sided adhesive and magnetic tape. Executed in different lengths.

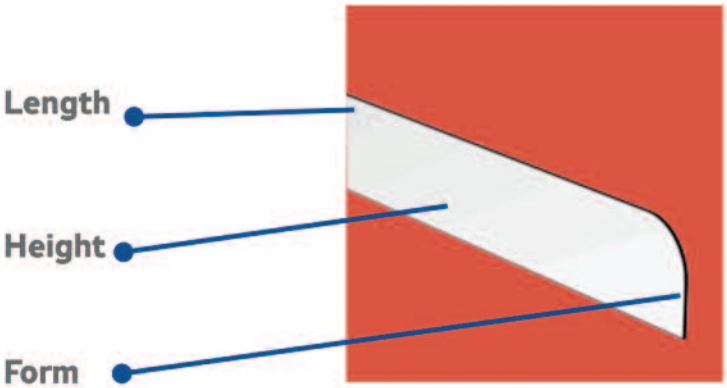


profile	height	art.no.
Divider 80	80 mm	EI225

THE EXCELLENT SOLUTION THAT ALLOWS YOU TO BE FLEXIBLE AND HELPFUL TO NEEDS OF YOUR CUSTOMERS.

This clip is used for a fixation of divider that is manufactured of an acrylate according to a request of customer on a selected length, width and height.





...Of acrylic divider according **TO YOUR NEEDS.**

...see page 59

DISPLAY AND CLAMP PROFILES

DISPLAY AND CLAMP PROFILES

Our product range includes a variety of poster profiles according to the poster size, type, and thickness of the material the poster is printed on. Poster and attachment profiles are essential equipment in all shops, banks, insurance companies, car showrooms, and pharmacies – they are needed everywhere where large-format advertising is displayed. These systems guarantee easy installation and handling of the poster profile and prevents posters from falling out. We also produce most accessories for poster profiles. It is simple to click hooks onto profiles.

Sleeve	Antireflex	Z003
	Glossy	

STAND FOR PLASTIC FRAME

The sloped base is an accessory for the plastic poster frame. When connected to the frame, the base can be used as a frame stand. The plastic frame is slightly tilted when fitted to the stand. Sold in pair.

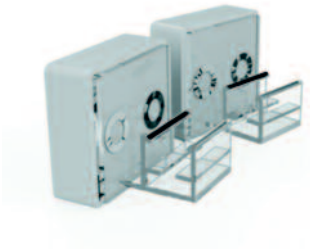
product	colour	art.no.
Stand	Transparent	Z020

STAND FOR PLASTIC FRAME

The flat base is an accessory for the plastic poster frame. When connected to the frame, the base can be used as a practical and attractive frame stand. When fitted to the stand, the plastic frame is vertical. Sold in pair.

product	colour	art.no.
Stand	Transparent	Z021

MAGNETIC HOLDER FOR PLASTIC FRAME

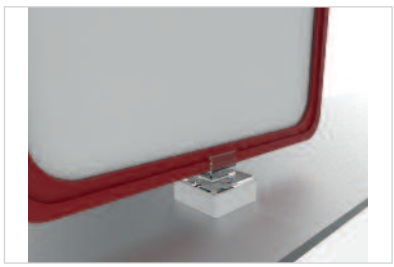


The magnetic holder is used to secure the poster frame. This version is designed to hold the plastic frame perpendicularly from the bottom. Frames with advertisements can be easily attached to a metal wall, frame, or other structure using the magnetic holder.

product	colour	art.no.
Magnet	White	Z024

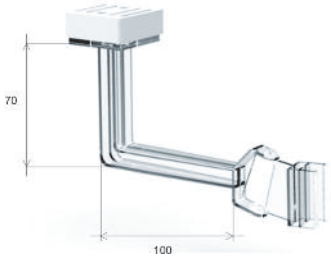
MAGNETIC HOLDER FOR PLASTIC FRAME

The magnetic holder is used to secure the poster frame. This version is designed to hold the plastic frame perpendicularly from the bottom. Frames with advertisements can be easily attached to a metal wall, frame, or other structure using the magnetic holder.

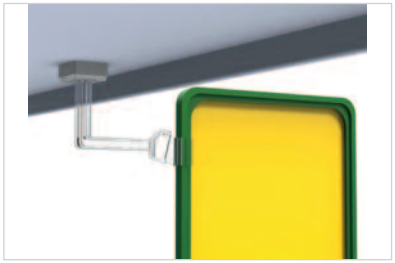


product	colour	art.no.
Magnet	White	Z025

ELBOW FOR PLASTIC FRAME

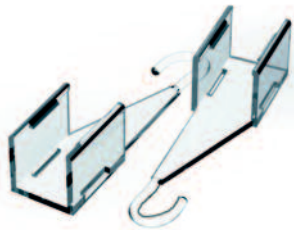


The magnetic holder is used to secure the poster frame. The system for attaching the plastic frame includes a rotating profile. The holder and magnet will help you easily attach the plastic frame with its advertising message to a metal wall, steel frame, or similar structure.



product	colour	art.no.
Magnet	White	Z026

HOOKS FOR PLASTIC FRAME



The flat base is an accessory for the plastic poster frame. When connected to the frame, the base becomes a practical and attractive frame stand. When fitted to the stand, the plastic frame is vertical. Sold in pair.

product	colour	art.no.
Hooks	Transparent	Z007

HOOKS FOR PLASTIC FRAME

The rotating plastic hooks are used to hang poster frames on wires, metal bars, or plastic hangers. One hook is attached to each side of the plastic frame. You can insert your selected advertisement into the frame and hang it in a suitable and prominent location.
The hooks are sold only in pairs to accommodate the hanging system, and the quoted price is for one pair of hooks.

product	height	art.no.
Hooks	45 mm	Z005

HOOK FOR PLASTIC FRAME

The hook can be used to hang poster frames on wires, metal bars, or plastic hangers for presenting company products or services. The hook is attached to the upper edge of the frame.

product	height	art.no.
Hook	30 mm	Z006

T-HOLDER FOR PLASTIC FRAME

The holder attaches the poster frame to a 10-mm diameter bar (the leg of the stand). You can easily create a promotional stand by attaching the plastic frame to the leg (using our fixture) and place your stand in the desired location.

Be creative and flexible with our services and offer your customers exactly what they want. Play with details and help your customers to present goods elegantly and with style. Select from endless possibilities of lengths of individual profiles, colors and also adhesive tapes.

Each profile can be unique, we can also find a solution for not standard situation and we are glad that we can meet your specific requirements.

A right choice of adhesive tape depends on a type of shelves. The standard adhesive tape is flat acrylate that is suitable for new shelves. For older shelves and coarse surfaces, we recommend to use a foam tape that is more suitable for such usage. For a better effect if you do not want to have a rest of tape on your shelves, you can use a magnetic tape that is very simple for an installation and removal from shelves.
